EDUCATION

Army Institute of Technology, Pune

June 2026

Bachelors of Engineering

Current GPA: 9.02/10

Course Work:

Computer Networks, Data structures, DBMS, Microcontrollers

Army Public School

June 2022

High School

Percentage 79.4

PROJECTS

AlgoAura - Algorithms ([Play Store](#)) *Firebase, Kotlin, Jetpack Compose, Room, Gemini SDK.*

- Developed a Data Structures and Algorithms (DSA) learning app supporting multiple programming languages (Java, Python, C++).
- Implemented real-time synchronization and secure cloud storage with Firebase.
- Enhanced code readability, maintainability, and efficiency by refactoring key modules.
- Integrated Google Gemini AI for query handling and Firebase Crashlytics for real-time monitoring.
- Included a whooping 1500+ Algorithms

Codeforcesly - CF Helper ([Source](#)) *Kotlin, Jetpack Compose, Room, Dagger Hilt.*

- Developed a feature-rich Android application that assists Codeforces users with competitive programming.
- Implemented core features such as user profile view, problem visualizer, contest tracker, friend management, and problem recommendations.
- Designed the app using Kotlin, Jetpack Compose, and Dagger Hilt, ensuring a clean and scalable architecture.
- Onboarding process integrates user profile setup, enabling seamless access to features.

Campuse Pulse ([Source](#)) *Gemini SDK, Kotlin, Jetpack Compose, Room, Firebase.*

- Built a mobile application to help educational institutions manage attendance and timetables, allowing teachers to record attendance and students to view status.
- Implemented admin features to manage timetables and student data, enhancing accessibility and usability.
- Performed code reviews to ensure adherence to coding standards and efficient performance.

Road-map Creator ([Source](#)) *Kotlin, Jetpack Compose, Gemini SDK, Room.*

- Enables users to create personalized road maps and flowcharts based on specific goals or tasks.
- Provides an option to save generated road maps as image files for offline use.
- Simplifies planning and tracking progress with an intuitive and user-friendly interface.
- Focused on making road map creation accessible and efficient.

SKILLS

Languages: Kotlin, Java, Python, C/C++, Dart, XML, SQL

Android Development: Jetpack Compose, LiveData, Room, Retrofit, Dagger Hilt, Koin, Coroutines, MVVM

Databases: Room, MySQL, MongoDB

Tools & Technologies: Android Studio, Git/GitHub, Postman, IntelliJ, VS Code, REST

Focus Areas: Mobile Application Development, Experimentation.

ACHIEVEMENTS

1st position, Secured 1st rank in App development contest 3.0 hosted by GDSC AIT PUNE.
